CAREER OBJECTIVE

Full-stack developer with hands-on experience in building REST APIs, web applications, and front-end interfaces. Passionate about server-side technologies and eager to contribute and grow in a professional environment.

PROJECTS

- **Authentication System with AWS Cognito:**
Developed a secure login system using AWS Cognito, React, and Amplify with multi-factor authentication.
- **Certificate Management System:**
Built a scalable platform in Node.js and MongoDB with JWT-based role authorization.
- **Weather Application:**
Real-time weather updates with Node.js and OpenWeatherMap API, using Axios for efficient API integration.
- **Blog Application:**
Designed REST APIs for CRUD operations and integrated with a front-end using Axios.
